

Eagle Tree Systems, LLC is pleased to announce powerful new sensors for the MicroPower eLogger!

Look at all you can learn about your model with your MicroPower and our low-cost add-ons:

- **HOW HIGH WAS THAT? Altimeter Expander (MPR-ALT-EXP)** - High resolution Altimeter measures Altitude from 0-20,000 with 4 foot (2 meter) resolution.
- **AND HOW FAST? Airspeed Expander (MPR-AIR-EXP)** - Measures airspeed from 9-200 MPH!
- **WHAT'S THAT BUZZ I HEAR? Servo Current Logger (SERVO-CURR-LOG)** - Find out how much current your servo is drawing. Plugs into your MicroPower and servo to log current from 0-5 Amps.
- **I WANT MORE! Multi-Expander (MPR-MULTI-EXP)** - Expands your MicroPower to log Brushless RPM, Throttle stick movement, and simultaneous recording of two temperatures! Includes integrated Brushless RPM sensor and Y cable for Throttle monitoring. Temperature sensors sold separately.
- **I WANT TO SEE IT ALL!! Memory Expander (MPR-MEM-EXP)** - Increases your MicroPower's onboard logging time by 5x!

All the sensors listed above can be used simultaneously. And, they work with all versions of the MicroPower - support is only a web download away. [Click here](#) to pre-order or for more information!

Remember, only the Eagle Tree MicroPower eLogger + PowerPanel LCD Display is both a powerful in-flight (or in-car) logger, and the world's smallest and lightest watt meter/bench monitor, all in one! And, no other logger offers anywhere near the range of features or sensors of the MicroPower!
