

Press Release- February 10, 2007

Have a multiple motored model and want data on its performance, or have a project requiring lots of sensors?

Eagle Tree Systems, LLC is pleased to announce immediate availability of new Expanders that make it easy to measure multiple Voltages, Currents, Temperatures, A/D Channels, and more. Never before has an affordable, off the shelf system offered this level of expandability!

Our new Secondary Expanders, when used with our standard Expanders, let you configure systems to measure 6+ Temperatures, 2+ Voltages/Currents, 4+ high resolution A/D Channels, and more. And additional custom Secondary Expanders can also be ordered for even more sensing!

These Secondary Expanders are compatible with all our Seagull and Data Recorder products (firmware upgrade may be required, and not compatible with MicroPower products).
